

A MASSIVE CONGRATULATIONS TO THE TEAM AT WONDER GRIP® IN ACHIEVING THEIR SMETA 4-PILLAR ACCREDITATION!

A SUCCESS STORY IN DIFFICULT GLOBAL TIMES – WORKING AGAINST THE ODDS!

Here at Wonder Grip®, we are absolutely delighted to have achieved our SMETA 4-pillar accreditation. A true mark that we take the Ethical compliance and Management within our operation extremely seriously; in terms of both complying and implementing the ETI Base code, ensuring our workers are treated fairly, humanely and in turn we create a company culture of safety and good working ethics and best practices.

The Senior Management at Wonder Grip® are extremely proud of every member of the Team within the organisational hierarchy in achieving this accreditation. Here at Wonder Grip®, we have a great team spirit within our global company network and work hard with all of our stakeholders to maintain this.

THE VALUE OF SMETA TO OUR BUSINESS

SMETA (Sedex Members Ethical Trade Audit) is an audit method used across 150 countries to evaluate all aspects of responsible business practice in global supply chains. Specifically, the 4-pillar SMETA encompasses labour standards, health and safety, the environment, and business ethics. The Supplier Ethical Data Exchange (Sedex) developed SMETA for suppliers to share ethical practices and reduce audit duplication, saving time, money, and resources.

As stated by Andrew Blasi, Director of a leading International trade and regulatory affairs consulting firm: "Ethical business conduct is, at its core, a principles-based or values-based approach to the way an organization operates."

THE SMETA METHOD

At Wonder Grip®, we utilise the SMETA audit method. SMETA makes it easier for us as a company to determine our strengths and drive continuous improvement within our supply chain.
