

Wonder Grip® are delighted to announce the launch of their Sustainability Report

Since 2019 here at Wonder Grip® we have been working hard to implement a Sustainable culture within our business; making a safer and healthier place for our workers to work in.

Working hard to develop products using more sustainable processes within both our supply chain and our company, saving water, energy, utilising electric cars, forklifts and pallet trucks through the use of solar panels within our factory improving our carbon footprint.

We have been working hard to streamline our operation in line with the day-to-day values of sustainability in an ever changing and demanding world of expectations. Giving our end user a safe, efficient and sustainably produced product.

We are delighted to announce the launch of our first sustainability report which brings together all the values that we at Wonder Grip consider part of our culture and part of everyday life to give our end user the product they deserve.

We continue as a business at Wonder Grip® to work within robust systems of best practice and strive to be the best in what we do.

Thank you to all of those within our global team at Wonder Grip® for all they do within Wonder Grip to ensure continual improvements and maintain a sustainable culture.
